# Simple 2D Template

Thank you very much for downloading this asset! I really hope you will enjoy it and find a use for it.

The goal of this asset is to provide a "Starting point" for your 2D game project. The code is kept simple and lightweight so you can easily find features in the scripts and customize them to your needs.

## Improving the Template

If you notice an issue or a missing feature, and you think that it would be really helpful for you. Please let me know about it. I really want to improve this asset, so if your request is directly related to it, I will most likely include it in the next version. Otherwise, you can also hire me for custom game development. Just reach out to me from my website [indiemarc.com](http://indiemarc.com)

## Other Assets

I created paid extensions to this assets:

- Dialogue System 2D – To create quests and dialogues for your game.
- Darkness System 2D – To use darkness and visibility as a game mechanic.

They can be downloaded from the unity asset store:
